

Deformation at Dixie Valley from Insar

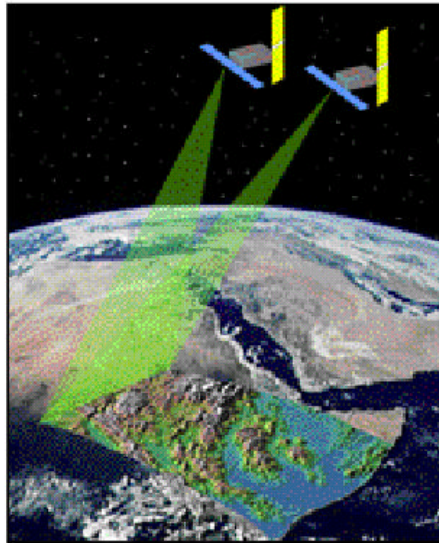

Bill Foxall

Lawrence Livermore National Laboratory

Radar interferometry for surface deformation

Wide area coverage (100 Km by 100 Km frames)

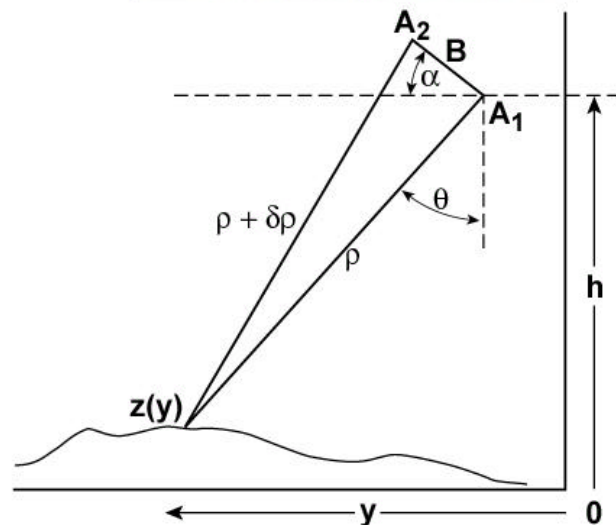

25×25 m pixel size

mm-scale accuracy locally

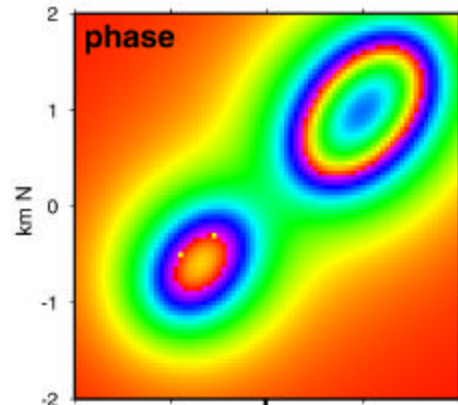

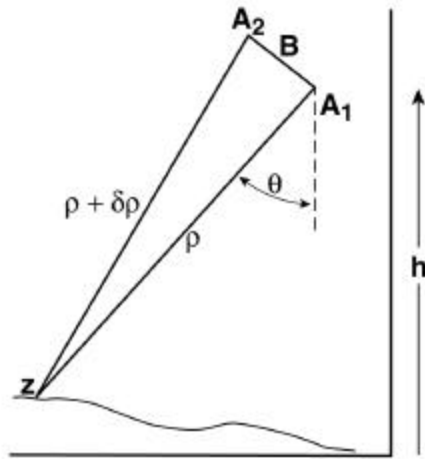

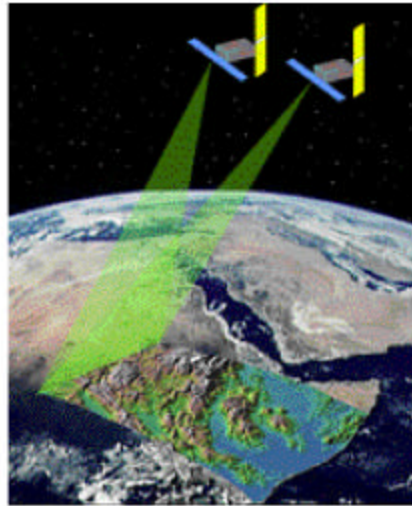

All weather, day or night

Global coverage

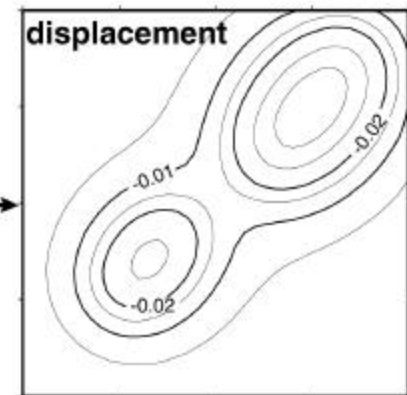

Images *complete* deformation field

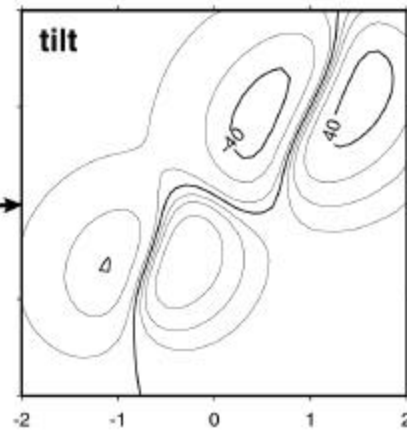

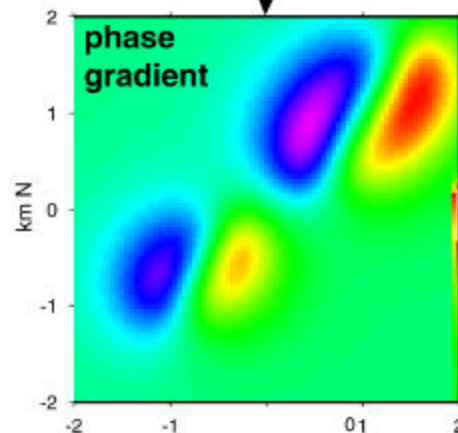

There are different ways of using InSAR images

unwrap

differentiate

$$\frac{\partial \phi}{\partial x} = kt_x \quad \frac{\partial \phi}{\partial y} = kt_y, \quad \text{where } k = (-4\pi/\lambda)\cos\theta$$
